1 TECH THAT WORKS

Get what you want, whenever you want it.
Giving you instant and reliable 24/7 access to online analytics is our priority.

GET BETTER ANSWERS FAST

Analytics to support and inform your decisions

Whether you're at the tactical level doing regulatory research, or at the leadership level running regulatory strategy, we at RxTROSPECT understand how important it is for your team to make consistent and well-informed decisions. Your authorized access to our online tool empowers you to drive better decision-making across your entire organization. With a single source of clean objective data, RxTROSPECT enables regulatory experts to perform in-depth and objective inquiry into hundreds of FDA oncology indications. By digging into this data and looking at the results, you are quickly positioned to synthesize findings with other more subjective-level analyses that you naturally may also be working through. This powerful tool is designed to complement your industry expertise by equipping you with market-leading analytics, which can be referenced alongside subsequent or parallel analysis to strengthen the confidence behind your conclusions and discoveries.

Your new and innovative solution

Never again will you need to worry about going through the rigmarole of data collection, then data validation, and finally preparing all of it in a report to get ready for an upcoming meeting. What previously would take days or weeks to collate using primitive research methods and time-consuming groundwork, with RxTROSPECT now only takes seconds. Go to work with the comfort of knowing that you are part of a team that actively seeks new and innovative technology to help their company work smarter, not harder. As an authorized user, we encourage you to get familiar with navigating our tool and allow it to do the heavy lifting for collecting FDA oncology precedent, while you focus on the more important areas of your job.

2 YOUR USER SKILLS

You are authorized — dive in, it's your tech.
The best decisions are those that are informed, rely on our data and be a strong source of info.

INTUITIVE & EASY TO USE

Get good at using the tool & be a standout leader

Knowledge is power. Good news is, you have access to it. As an authorized user you get to see all key decisions surrounding FDA oncology indications, with precedent spanning back over a decade. There are a lot of different features that our RxTROSPECT product experts have explored and built, they know how you think and know what you need to make an impact in your organization — our tool is designed with you in-mind.

We want you to be able to share your findings with your colleagues and collaborate over the discoveries you've made. Go to meetings with the confidence of this powerful tool in your back pocket. Show your findings with a quick screenshot of a RxTROSPECT dashboard, or include it as a slide deck in your scheduled presentations. Our tech improves the way you work.

Play with the tool, you won't break it

We don't patronize you with elementary videos on how to select a dropdown box, or how to click and drag your mouse button to select data on a chart. We pride ourselves on giving you a tool that is extremely intuitive and easy to navigate. After spending 15 minutes on it, you will recognize its value and we hope that you use it as an everyday solution to complement your regulatory work and study. We encourage you to get confident using the tool, that means clicking on different filters, subscribing to different views, and screenshotting or downloading your findings to include in chats, emails or meetings.

Like any technology, it's only as powerful as its users. If you find yourself stuck and not being able to navigate a specific feature of the tool or want to know if you can find something in particular, don't hesitate to reach out.

3 PRODUCT NOT SERVICE

Giving you a tech solution...not consulting.

We don't replace your job, we help you to do it better and faster with a new innovative tool.

YOUR FINDINGS, YOUR DECISIONS

You are a regulatory expert, we are a tech solution

We don't blur the lines on what we deliver. We give you a cutting-edge analytics solution that enhances your ability to find answers to your business-related questions. RxTROSPECT is purposefully built to complement your job, not compete with it. Our product leadership is deeply rooted in the pharmaceutical industry, they are deliberate in giving you *objective* analytics. This allows you to apply your own context when taking a particular path of inquiry. It keeps avenues open for you to cross-reference any objective findings with other discoveries that require an element of interpretation and subjectivity. We get it, this is your job and your team's purpose. We don't take that away from you, we give you a tool that helps you do it better.

RxTROSPECT, together with your expertise, collectively enhances your team's ability to perform analysis and synthesis. At scale, our tool makes your team more agile, by allowing them to collaboratively share and see insights on one uniform platform, resulting in faster and better-informed decisions. It is designed to be in the hands of your entire organization. Why? Because we know that data driven decision-making means sharing information, and doing it succinctly with speed. RxTROSPECT is built to accelerate just that, to quickly exchange your explicit findings and put you in a position to immediately speak to them with context of your business initiative in-mind.

Helping you solve your problems with our tool

Our product team at RxTROSPECT cares about what you're working on. We want to help you bring your own products to market faster and with more confidence. With this in-mind, we focus on maintaining a balance between:

(1) Ensuring our tool is working to help *you* answer questions using data analytics; and

(2) Our team personally being asked if *we* can answer your questions using our online tool.

We appreciate that this is a balancing act, because let's face it... how do we know if our tool answers your questions, if we don't listen to what your questions are? This is a puzzle that our RxTROSPECT product team diligently navigates. In some cases, this may see our product leadership get directly involved with users to talk through some of the relevant indications and studies that our customers are looking at within the RxTROSPECT platform. If this does occur, it is done purely from a tech and product aspect, rather than a consulting aspect. It's important for us to make this distinction, RxTROSPECT is not a consulting firm. Our current focus is being a tech pioneer in your industry, with innovative product solutions, built to enhance the performance of your regulatory research and intelligence.

PRODUCT DEVELOPMENT

We know what you're looking for in a tool

What makes us better than other cumbersome methods you've used in the past? We cut-out the stuff that gets in the way of finding you answers quickly. This might sound simple, but it's not, it takes a lot of work and careful thought to keep our features succinct and intuitive.

RxTROSPECT is different. We are a product-led organization. All decisions are made with you, the user, in-mind. When we design new features, we know what you want: speed, reliability, and accuracy — this is exactly what we give you. Combine this with an innate understanding of regulatory research and intelligence, and you get a thoughtful, intuitive tool that cares about your user experience.

DECISIONS**

4 ASK US ANYTHING

It doesn't hurt to ask, feel free to reach out. Our tool is continuously improving. If you want something, let us know and we will try to help.

LET US IN YOUR PASSENGER SEAT

You are always the driver, but we can help you navigate

Like anything you're in control of, you make the decisions. In this case, you get to choose the path of data inquiry and analysis. While it's true that our tool is forever improving with new enhancements and pathways for you to explore, we pride ourselves on delivering a user experience that allows you to readily see and understand the features that are available. We know our customers are intelligent people who are well-versed in navigating different research methods to find what they need. The good news is, once you get comfortable using RxTROSPECT, you'll no longer have to dig deep into Mariana's Trench to get answers. We did the heavy-lifting and brought the data to the surface, so the only light-work you need to do are things like *clicking on different tabs, selecting chart data with your cursor, or choosing a dropdown option to narrow down results* — all of these features are intuitively accessible upon login. However, if you do find yourself unsure on whether RxTROSPECT can reveal a particular insight that you are looking for, you can always contact us to confirm the scope of our tool.

We get you to the finish line faster

Like any tech solution, RxTROSPECT will help make your research faster and more reliable, but it doesn't automate every bit of research that you might need. As a gauge, our customers tell us that RxTROSPECT typically gets them about 90% through their objective research, which is huge! In other instances, regulatory experts choose to marry their RxTROSPECT findings with wider subjective analysis, which we strongly encourage our users to do.

We are always interested in learning about the new ways our customers are using RxTROSPECT. Feel free to share your favorite feature that is your preferred "go-to", or indulge us with a unique use case involving our tool.

5 GIVING YOU ANSWERS

We got you covered, available for you online. Our tech exists to make your life easier, our team at RxTROSPECT is here to do the same.

TECH PERFORMANCE

Let us know if things aren't working

RxTROSPECT is an analytics product that is built with market-leading technology. Our chosen business intelligence platform is *the* best and most reliable global solution. We closely monitor performance to ensure things are running smoothly. That said, if things don't look like they're clicking on your end, don't hesitate to let us know by emailing us at theteam@rxtrospect.com.

TOOL SCOPE

You'll be an expert in the tool capabilities in no time

We are confident that you will find our tool easy to pick-up and understand. But it's only natural that our customers want to push the boundaries of their new tech to see what it can do. Feel free to email us if you are stuck with a unique question that you expected to find an answer for using RxTROSPECT.

NEW FEATURE REQUESTS

1% better everyday

At RxTROSPECT, we own our niche and like being the quiet achiever that makes big waves as a tech pioneer. We are able to achieve this through our pursuit of constant improvement. While we like to think we always know what is best for our customers, it's always better to hear it from you first. Let us know if you have any requests or quick-wins that you think would be handy.

**CONGRATS ON BECOMING AN AUTHORIZED USER,
WE ARE EXCITED TO BE YOUR NEWEST TECH SOLUTION!
